

### **TRECVET Project - End of Project Conference**

Centre for Factories of the Future (C4FF) is pleased to announce TRECVET project ([www.trecvet.eu](http://www.trecvet.eu)) final conference. The Conference is being arranged and will take place on 20th September 2013 at Chamber of Commerce premise in Palma de Mallorca, Spain.

The TRECVET project is developing an innovative software tool which, by breaking syllabi down into their smallest parts and making them comparable in an objective way, will enable authorities to more easily implement the ECVET principles. This is done on the example of Small Commercial Vessel Qualifications from Spain, Germany and the UK. The Conference in Palma de Mallorca will showcase the results with presentations from the consortium as well as from policymakers and stakeholders across Europe. Furthermore the conference is encouraging networking and open discussion about the future use and implementation possibilities of the software tools.

Maritime authorities and institutions, crew agencies, accrediting bodies, shipping companies, ECVET experts, ECVET implementing bodies, experts from other qualifications, journalists and any interested parties are invited to join us. **THIS EVENT IS OPEN TO PUBLIC.**

For more information, please contact conference coordinator, Mrs Silja Teege, via [email@sea-teach.com](mailto:email@sea-teach.com); Tel: 0034-971 648 429

More information about the conference will be available at forthcoming days at [www.trecvet.eu](http://www.trecvet.eu)

### **MariFuture Workshop and presentations at the EU Maritime Day in Malta, 21-22 May 2013**
