MariFuture is pleased to announce that first The International Maritime Training Conference will take place in Bled, Slovenia, on 20 November, 2012. The International Maritime Training Conference aims to promote and share good practice and transnational cooperation in the field of the application of Information and Communication Technologies (ICT) learning and assessment products developed to support maritime training.

The conference is an excellent opportunity to present the innovative ICT based products used for training at your institution to a wider international audience. You will also see examples of good practice for maritime education and training from other international organisations.

MarTEL (www.martel.pro), egmdss.com (www.egmdss.com), MarEng (www.mareng.utu.fi), NetOskar (www.netoskar.fi) and MEP products (<http://www.deis.ie/learning/course/category.php?id=2>) were selected as examples of good practice models by the conference committee and so will be promoted at the conference.

You are invited you to attend the International Maritime Training Conference hosted by Spinnaker d.o.o, at Bled (Slovenia) on the 20th November 2012. You may attend the conference in person or watch it live.
